

JIM HALL

FRONT END WEB DEVELOPMENT

Jim.Hall.Dev@gmail.com

773 899 1577

Over 4 years of development experience with a focus on front end web development and architecture. A natural leader who is energized by a challenge. Focused on slick looking, smooth operating, lightweight solutions to business requirements due to a background in UI/UX and design. A quick study interested in learning the right tool for the job at hand.

EXPERIENCE

Kaplan - Chicago, Illinois - **July 13 - March 14**

Position: Javascript Developer

Developed parts of a web application using EmberJS, Ember Data, Stylus, and Handlebars. Architected parts of the application used by multiple team members. Performed Scrum master duties. Worked with Node and Express. Built Ember template precompiler Middleware. Used Git in a well structured branching system.

Tribune - Chicago, Illinois - **January 13 - July 13**

Position: Front End Web Developer

Built useful small JavaScript libraries used by our team. Created jQuery modules used throughout site. Lead small team of front end developers. Performed code reviews and helped other developers solve problems. Created templates using JSTL and JSP.

Sears - Chicago, Illinois - **July 12 - January 13**

Position: Front End Web Developer

Worked on a large team pinpointing, debugging and fixing javascript and css issues and creating promotional pages. Rebuilt the JavaScript module loader used by the team to render the home page on my own initiative. Spent time learning the ins and outs of Javascript.

Pander Commander LLC. - Chicago, Illinois - **March 12 - February 13**

Position: Developer, Co-founder and Partial Owner

Brought together a small group of talented developers to create a social startup. Build parts of our javascript library and plugins. Built PHP models with MySQL queries for our CRUD system. Began work on an iOS version of our application.

C|Change Inc. - Chicago, Illinois - **July 11 - July 12**

Position: Web and iOS Developer

Sole developer for 14 person marketing company. Built client and experimental websites. Taught myself Objective C and developed two iPhone apps. Designed print media, interfaces, and motion graphics.

AlphaMetrix LLC. - Chicago, Illinois - **Dec 09 - July 11**

Position: Graphic Designer, hired from internship position

Worked on a small team doing interface, logo, and print design. Did web and flash development, filming, production, and motion graphics. Worked in Wordpress and a web content editor.
